The report is part of IEA-PVPS Task 1, which focuses on the technical, economic, and social aspects of PV power systems.

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Falling solar panel costs, ongoing technological advancements, and higher efficiency levels are driving adoption across residential, commercial, ...

The Global Market Outlook for Solar Power 2025-2029 is SolarPower Europe's flagship annual publication, delivering the most authoritative analysis of solar market trends worldwide.

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of ...

Global Manufacturing The United States manufactured approximately 15.7 GWdc of PV panels in H1 2025, up 126%, y/y, and 440% over the past two years. In Q3 and early Q4 2025, domestic ...

The increase in solar PV capacity is set to more than double over the next five years, dominating the global growth of renewables. Low costs, faster permitting ...

Explore the latest photovoltaic panel trends in 2025, including perovskite cells, bifacial panels, and smart integration. Discover how these innovations boost efficiency and drive sustainable energy adoption.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...
