The Ministry's objective is to improve Barbados' energy security and resilience, as well as reduce its dependence on imported fossil fuels, resulting in ...

The electricity delivered will come from a 50 MWp Solar photovoltaic plant combined with an energy storage system using hydrogen technologies for long term storage and a li-ion battery ...

Due to the intermittent nature of solar and wind power, this 100% renewable energy vision can only be achieved with renewable baseload powerplants such as RSB. ...

Barbados has taken a monumental step towards energy independence by officially granting a 25-year license for a 50MW solar PV ...

Building on a successful Renewable Energy Rider program which has seen 9MW of distributed solar PV installed, the electricity market has finally opened up to ...

Generation from solar will now add 10MW per day of renewable energy to the national energy grid. The 2.2% of our generation produced by this plant represents energy to power the appliances and ...

2019 The Policy provides a framework for moving from a fossil fuel-based economy to one completely based on renewable energy sources by 2030. This Plan identifies output-level measures that will ...

Barbados' renewable energy agenda is progressing steadily, but the publication of key project documents is being postponed until supporting ...

Pavana Energy's main focus is to provide appropriate technological solutions for small islands, with turbines sized between 50kW - 750kW, or PV solar arrays ...
