French state-backed utility Engie has broken ground on the second of the battery energy storage systems (BESS) awarded it by Belgian grid ...

Discover how industrial batteries and smart EMS systems drive energy transition in Belgium: cut costs, earn flexibility revenues, and meet EU targets.

Wärtilä; has begun construction of a 50MW/100 megawatt-hour battery energy storage facility in central-eastern Belgium for Gramme Storage 1. The project, known as Gramme 1, aims to ...

Battery energy storage systems (BESS) are no longer just a promising technology, they're now a cornerstone of Europe's clean energy transition. In 2025, the momentum gained in ...

The project marks a significant new milestone in expanding the collaboration between NHOA Energy and ENGIE, as it follows the ongoing construction of the 400 MWh Kallo BESS, ...

New-build battery storage projects from three developers totalling 357MW were among resources awarded contracts in Belgium's latest capacity ...

Modular Battery Energy Storage Systems (BESS) for the C& I segment ranging from 100 kWh to 5 MWh. Seeking industry partners and research centers to collaborate on its R& D roadmap ...

Technology group Wärtilä; has been selected by Gramme Storage 1 to deliver a 50-MW/100-MWh battery energy storage system (BESS) in central-eastern Belgium. The companies on ...

From enhancing grid stability to unlocking flexibility and operational efficiency, our utility-scale battery energy storage solutions are built for real-world performance.
