This is a detailed walk-through of the planning and installation of our 3kW - 5kWH - 120V off-grid solar system that powers a rehabbed shipping ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power ...

These three parts form a microgrid, using photovoltaic power generation to store electricity in the energy storage battery. When needed, the energy storage battery supplies the electricity to the charging pile.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy ...

It integrates advanced photovoltaic modules, inverters, and electrical cabinets into a compact and functional unit. Ideal for remote areas, emergency power supply, and various off-grid applications, ...

Discover durable solar battery boxes for your trolling motor, RV, boat, or solar panel setup. Featuring multi-port functionality and weatherproof designs.

SolaraBox is built to solve project power needs. The system is modular and easily scalable: you can add multiple units to increase output, and it supports on-grid, off-grid, and hybrid configurations.

Types of our mobile solar constructions. We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this ...
