The BESS would charge with power from the electric grid during periods when there is excess energy and deliver power back onto the electric ...

Can a big battery help Boston save billions on the power grid? Maybe. Grid operators don't readily let batteries stand in for costly transmission upgrades, but this massive Massachusetts ...

With global energy storage demand projected to triple by 2030, Boston's export-ready solutions position international buyers at the vanguard of sustainable power infrastructure.

Jupiter Power has unveiled plans to construct a 700MW BESS facility at a former oil depot previously owned by ExxonMobil in Massachusetts.

Jupiter Power's 700 MW battery storage facility in Everett will be Massachusetts' largest, part of the state's push to reach 5,000 MW by 2030.

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials say...

Plus Power has commenced operations at its Cranberry Point energy storage facility in Carver, Massachusetts, US. The facility is claimed to ...

As outlined in the recent presentation for the local community, Flatiron is proposing to construct a 168MW BESS, known as Salt Cod Storage, at the former coal-fired Montaup Power Plant ...

Plus Power has commenced operations of its Cranberry Point Energy Storage facility in Carver, Massachusetts. The standalone utility-scale battery energy storage system (BESS) project ...
