Solar performance will vary based on the specific glass selected. 3M strongly recommends that specific glasses be measured for performance with and without UCSF in order to best predict performance.

Solar ultra-clear rolled glass offers superior light transmission compared to standard float glass, resulting in enhanced energy efficiency in solar panels. Its improved optical properties ...

The glass is renowned the world over for its colour-neutrality, high transparency, low light reflection and excellent solar control, making it possible to create facades with a particularly transparent and ...

The Louise Tower has long been one of the most recognisable elements of the Brussels skyline. Formerly known as the ITT and Generali Tower, the building has recently undergone a major ...

Our Solar Glass are with best quality, EU market standard, designed and optimized to suit the requirements of various solar technologies with properties such as ...

Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light transmission.

Solar Ultra-clear Rolled Glass finds its primary application in the solar energy sector. Its high transparency allows solar panels to absorb maximum sunlight, increasing efficiency.

To the naked eye, the product looks just like regular glass, but with the unique ability to harnesses the power of the sun, which turns any building ...

High-transmittance ultra-clear glass panels with AR coating. Designed for superior light throughput and high impact resistance to enhance PV durability.
