A plan for the country's biggest solar project is moving ahead in California. If built, it'll power entire cities and millions of homes. Dan Charles reports on the farmers behind the project.

Here is a list of the largest solar farms in California --ranked by peak operating capacity in megawatts AC. Scroll down to view information on each project like ...

The Ivanpah solar power plant formally opened in 2014 on roughly 5 square miles of federal land near the California-Nevada border. Though it was hailed at the ...

Ivanpah is the state's flagship solar-thermal complex, using mirror fields (heliostats) to focus sunlight onto three central towers that make steam for turbines. ...

When Ivanpah began operating in 2014, it ranked as the world's largest solar plant. It seemed like a viable solution to California's renewable energy goals of employing affordable and...

A whopping \$2.2 billion was splashed on the Ivanpah Solar Power Facility in California's Mojave Desert in 2014, with it promising big things. The ...

In California's Central Valley, a plan is being put forth to turn unused farmland into the largest solar installation in the US.

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve

California s largest solar farm

A mammoth solar farm is moving forward in the heart of California. If built, which seems increasingly likely, it would cover 200 square miles of land and generate 21,000 megawatts of ...
