A breakthrough in solar panel manufacturing takes a significant step toward a "closed-loop" manufacturing process. Researchers at SolarCycle and Arizona State University (ASU) ...

Researchers have proven that solar panels made with recycled glass can be just as efficient as those made with new materials.

One common type is transparent solar glass, which allows light to pass through while still generating electricity. This type of glass is often used in windows and skylights to provide natural ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America, with ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America, with...

Chinese scientists develop self-healing solar glass that can generate electricity while remaining transparent.

At present, there is a huge demand for rolled glass for solar PV applications over float glass because there are certain benefits of using roller glass. For example, a ton of rolled glass is less energy ...

The company plans to build a solar glass factory in Cedartown, Georgia, next to its existing recycling factory. It'll be the first in the world to use recycled cullet like this at commercial...

While the potential of solar glass has been widely talked about, the technology has never reached critical mass. With new policies now set to ease China's solar production constraints, we ...
