The Canberra CAES project isn't just local news - it's a blueprint for global energy transition. By combining proven physics with modern engineering, compressed air storage offers a pragmatic path ...

We then calculated the levelised cost of storage for comparison with other storage technologies and concluded that A-CAES would be a zero ...

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal role in achieving ...

The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy transition by ...

Connecting to the Evoenergy electricity distribution network, the Williamsdale BESS is part of the ACT Government's Big Canberra Battery project. It will have the capacity to store enough renewable ...

The BESS will store energy generated during times of surplus renewable generation and off-peak times, helping to manage Canberra's peak ...

Williamsdale BESS will deliver a key stage of the ACT Government's Big Canberra Battery ecosystem, helping the Territory reduce reliance on fossil fuels and achieve its 2045 net zero emissions target.

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

Since 2012, we have contributed over 4.5 GW of renewable energy & storage assets and invested over \$7 billion towards Australia's energy transition. The ...
