The first part of this report is on Stellantis" strategy and recent developments, covering its electrification strategy, plans for launching new electric vehicles, and battery production plans.

Production of U.S. BEVs grew faster than U.S. battery production, leading to increased use of imported battery cells in 2022 and 2023. As of 2023, U.S. BEV battery production relies on imports for ...

The Electric Vehicle Outlook is BNEF"s annual long-term report on how electrification, shared mobility, autonomous driving and other factors will impact road transport.

This article dives deep into market highlights, key trends, and provides a company-by-company breakdown of the top BEV players, covering their background, flagship products, and ...

PDF | Battery electric vehicles, otherwise called BEVs, are completely electric vehicles which runs on rechargeable batteries.

According to the latest report by Mordor Intelligence, electric vehicles market size is entering a high-growth phase, rising from USD 0.67 trillion in 2025 to USD 0.75 trillion in 2026, and ...

Investigate the technological advancements of Battery Electric Vehicles (BEVs) and Fuel Cell Electric Vehicles (FCEVs), with a focus on their historical progress and current innovations.

Battery electric vehicles already represent more than 70% of total unit sales, while Asia-Pacific contributes over half of global demand, supported by China"s large-scale lithium-iron ...

This paper presents a comprehensive review of current and next-generation BEV powertrain architectures, focusing on five key subsystems: battery energy storage system, electric ...
