BMS16T can detect charge and discharge current by same shunt. All cell voltage and current are calibrated before delivery.

The Chargery BMS16T is designed especially for LiPo, LiFe and LiTo battery packs applied to Energy Storage Systems and Electrical Vehicles including E-Motorcycle, E-Scooter and so on.

Special Features The BMS16T uses advanced ADC measurement technology, high accuracy, high voltage and high current detection circuit. The maximum voltage measurements tolerance is within ...

cell voltage, charge & discharge current, battery temperature, and battery SOC (State of Charge), displayed with TFT color LCD. Please read the entire manual completely before using, to make sure ...

Chargery Power Co., Ltd. as manufacture of power system warrants its BMS16 and current Sensor to be free of defects in material and workmanship. This warranty is effective for 12 months from date of ...

Extracts frames from Chargery BMS (protocol v1.25) and converts them into messages published to a mqtt broker. Messages are published in three topics ...

The BMS16T can fit with any lithium battery charger, when any cell over charged, the BMS16T will open the charge relay to cut off charge, if fit with CHARGER Y charger, need not the charge relay,

Overview: The Chargery BMS16T is designed especially for LiPo, LiFe and LiTo battery packs applied to Energy Storage Systems and Electrical Vehicles including E-Motorcycle, E-Scooter and so on.

Connecting a battery I see allows the unit to default to whatever the highest probe wire is, so it looks like it will power on and return to expected operation. Still a little unsure about voltage ...
