Financial aspects  
Future plans and investments  
According to International Energy Agency in 2015 electricity generation in Armenia increased since 2009 to nearly 8000 GWh, but still remains below 1990 levels. Also, in 2015 Armenia consumed more than twice as much natural gas than in 2009. Armenia lacks fossil energy source, and heavily relies on the production of electricity from a nuclear power plant and hydro power plants, and uses imported fossil fuels to o...

In addition to a highly efficient energy system, a faster transition towards cleaner energy sources, especially renewables in both electricity and heat generation, will help Armenia to reach Net ...
