This Wi-Fi stick features a compact device, measuring a mere 51 x 112 x 27 mm, and epitomizes the "plug & play" experience. Simply insert it into our inverters, ...

Huawei's photovoltaic inverter communication stick acts as the central nervous system for solar installations, enabling real-time data flow between inverters and monitoring platforms.

The product offers support for a rich set of data protocols, including TCP/UDP/HTTP, enabling it to connect with diverse protocol servers and facilitating the remote monitoring of solar energy ...

On top of that, the customer can use it as a WIFI stick during normal operations and when the WIFI goes down the datalogger will automatically switch to cellular. ...

Thanks to the hardware developed by Ingeteam's engineers, communication with the PV inverters can be done locally or remotely from a PC. Every communication board features a special connector ...

GoodWe HK3000 is a solution designed to monitor load energy consumption in real time and help end users better understand and manage electricity consumption.

Use RS485 communication method to connect the inverters, up to 10 Solis Single Phase Grid-Tie inverters can be connected at the same time. Data ...

SOLARMAN stick logger supports GPRS, WiFi, 4G, Ethernet and other communication method. Furthermore, stick logger supports RS485/RS232/TTL/USB and other serial communication. With the ...

Via WLAN and Fast Ethernet (FE) connection, Smart Dongle supports up to 10 inverters to communicate with the solar management system through ...
