Congo isn't just about storing energy - it's sitting on 70% of the world's cobalt reserves. This mineral isn't just for EVs; it's crucial for alkaline electrolyzers in hydrogen production.

Recent pilot projects by Belgian startup H2Congo show promising results - storing surplus hydro energy as hydrogen during rainy seasons, then converting it back to electricity during dry months. Congo ...

As global demand for low-carbon hydrogen accelerates, Congo-Brazzaville is positioning itself not merely as a resource holder but as an active architect of Central Africa's sustainable energy ...

This article explores how the Congo hydrogen storage subsidy program works, its impact on the energy sector, and actionable insights for businesses looking to capitalize on this growing market.

Detailed maps and technical data for gas transport infrastructure and liquefaction terminals in the continent are reported to inform and elaborate findings about readiness for hydrogen trading ...

Meta description: Explore Congo's new energy storage project bidding process, market trends, and investment opportunities. Learn how renewable integration and battery innovations reshape Africa's ...

The DRC currently has no manufacturing base for electrolyser systems, hydrogen compression or storage, fuel cells, or synthetic fuel technologies.

Hydrog&#232;ne de France (HDF Energy) has entered into a partnership with the government of Kinshasa, a city-province and capital of the Democratic ...

The World Bank said it is committing \$1 billion to help the Democratic Republic of Congo prepare for the development of the next stage of what could be the world's biggest hydropower project.
