The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Buildings and the construction sector account for over one-third of global final energy consumption. The potential to integrate solar photovoltaics ...

This timeline features the key innovations that have advanced the solar industry in the United States. Learn more about these key events from 1955 to present.

Specifically, it refers to reserving the space necessary for agricultural planting and breeding in the design, construction and operation of PV power stations, so as to ensure that ...

In our latest Short-Term Energy Outlook (STEO), we expect that U.S. renewable capacity additions--especially solar--will continue to drive the growth of U.S. power generation over the next ...

In addition to improvements in solar cell efficiency and structural innovations such as bifacial panels and solar trackers, advancements in power electronics and control algorithms have ...

From 2016 to 2022, PV has seen an annual capacity and production growth rate of around 26%, doubling approximately every three years.

Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and have been removed temporarily w.e.f. 31.05.2025. For more details, Click below.
