Our GEN-C generators are powered by world renowned engines ranging from Perkins to Cummins, ensuring top-class operation as well as maximise fuel efficiency at all times

Imagine a flame erupting inside a 40-foot power generation container packed with sensitive equipment. Traditional water-based systems would cause catastrophic damage. This is where gas fire ...

At the beginning of the Tier 4 transition, our engineering team had the opportunity to work with different customers in different markets to design and develop a line of ...

HI-FOG high pressure water mist is an ideal fire protection solution for power generation applications, as it can be activated immediately the moment a fire is detected while being entirely safe for people.

Emergency Power Containers, also referred to as containerized solar energy systems or foldable PV storage containers, have become the go-to solution for disaster recovery zones, off-grid ...

Complete MWM Container solutions: read about intelligent and complete turnkey systems for decentralized energy generation (combined heat and power plants - ...

Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation needs.

Originally launched for limited markets in 2021, the 40-ft ...

It utilizes shipping containers or modular structures to create a self-contained environment for generators of various sizes. These enclosures are specifically ...
