The Solar Energy Technologies Office (SETO) of the U.S. Department of Energy has released updated 2024 PV System Cost Model ...

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

Average construction costs for solar generators increased by 1.7% in 2022, and for wind turbines they increased by 1.6%. These three ...

This database contains unit cost information for different components that may be used to integrate distributed PV onto distribution systems. The total cost of implementing different upgrades on a given ...

The industry survey seeks to understand the cost structure for each stakeholder, including how their costs are affected by scale, overhead, and market distortions.

The residential cost of installing a PV array in the USA in 2023 is about where we were 10 years ago down under in Australia. There was and still is not permitting costs a large saving.

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

We are pleased to announce the release of the latest edition of Berkeley Lab's Tracking the Sun annual report, describing trends for distributed solar photovoltaic (PV) systems in the United ...

This report provides an in-depth analysis of the USA's PV market and developments over the past year. This comprehensive report is part of IEA ...
