The U.S. energy storage industry installed a record-shattering 57.6 GWh of new capacity in 2025, the largest year of new additions on record.

According to the American Clean Power Association's (ACP) and Wood Mackenzie's latest U.S. Energy Storage Monitor report released today, ...

Owing to the energy storage incentives introduced by the Inflation Reduction Act (IRA), annual energy storage capacity additions in the U.S. have ...

Generators added 10.4 GW of new battery storage capacity in 2024, the second-largest generating capacity addition after solar. Even though battery storage capacity is growing fast, in 2024 ...

A zero-carbon future by 2050 would require 930 GW of storage capacity in the U.S. 33, and the grid may need 225-460 GW of long duration energy storage (LDES) capacity. 34 Hydrogen, CAES, and PHS ...

A new report indicates that the nation's energy storage market added 12.3 GW of installed battery capacity in 2024. The latest U.S. Energy ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

In 2024, the United States had nearly 1.3 terawatts (TW) of generation capacity, as well as nearly 29,000 MW of energy storage, an 11,000 MW increase in energy storage in the past year. The largest fuel ...
