Yes, each manufacturing unit in the production and handling of solar panels must obtain its own license for BIS certification. This applies even if the manufacturer has more than one ...

India has published the Solar Systems, Devices and Components Goods Order, 2024 which prescribes the Indian BIS certification for affected products.

The inclusion applications for Solar PV Modules may be submitted along with test report for the new standards. The inclusion of series model as per new Standard will not be permitted ...

The Ministry of New and Renewable Energy (MNRE) and BIS have released new mandatory standards under the Solar Systems, Devices & Components Goods Order, 2025. From July 27, 2025, only ...

Learn about solar power standards and guidelines provided by the Bureau of Indian Standards for ensuring quality and safety in India.

To ensure that solar equipment meets minimal safety and result standards, the Bureau of Indian Standards (BIS) has made certification compulsory under its compulsory registration scheme (CRS).

Every manufacturer or importer of solar photovoltaic modules--whether operating domestically or internationally--must obtain BIS registration for solar panels before selling or distributing them in India.

On successful implementation of the revised Standards, BIS shall issue a letter indicating all the model(s) for which the compliance has been successfully established.

Solar PV modules, inverters, and storage batteries must comply with the latest Indian Standards (as specified by BIS) and carry the Standard Mark under a BIS license.
