Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage ...

Google's new Minnesota data center deal includes 1.9 GW of wind, solar, and an iron-air battery, the largest ever system by energy capacity.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest ...

Form Energy invented a novel iron-air battery to store clean energy for much longer timeframes than conventional lithium-ion batteries can. The startup is still constructing its first ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are ...

To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the ...

Recommendations for tailored energy storage solutions in diverse applications. This review investigates the integration of renewable energy systems with diverse energy storage ...

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

The project would add 1,400 MW of new wind energy capacity, 200 MW of solar power and 300 MW of long-duration energy storage. Google will also invest \$50 million in Xcel's efforts to build a ...
