OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve

Dushanbe's rooftops can support a total photovoltaic capacity of 310 MW, generating approximately 447 GWh annually. The study employs GIS-based analysis and the Liu-Jordan model to assess solar ...

NextConstruction work at the Rogun hydroelectric power station is almost 60% complete.
