Explore agricultural logistics for Kenya and Ethiopia's exports, focusing on cold chain solutions and trade innovations in East Africa.

Custom power and temperature control system for Africa vaccine cold chain facilities, ensuring stable refrigeration, solar integration, and reliable operation under unstable grid conditions.

In addition to economic, social, technological and environmental limitations, this study examines the triumphs and challenges of incorporating ...

Reefer containers typically operate on a standard voltage of 380-460V and require three-phase electrical plugs to function efficiently. This setup ensures a stable ...

Air temperature in the fridge, condenser outlet temperature and power consumption were measured and given in the figures. The first test was ...

The answer lies in refrigerated container refrigeration generators - the unsung heroes of temperature-controlled logistics. As global trade expands, these systems have become critical for food safety, ...

The region needs low-cost, energy-efficient cooling innovations, particularly temperature-controlled logistics (TCL), but conventional technologies ...

The study is organized as follows. Section 2 presents the challenges hindering food security, access to controlled temperature storage for vaccines and medical products, and the ...

He is chief executive officer at temperature-controlled storage facility and logistics provider Cold Solutions and is GCCA Africa Council Chairman for 2026. He says, "The development of cold chain ...
