In this paper, a concept of using renewable energy sources in an autonomous ground-based docking system for unmanned quadrotors is presented. The prototype of the station was manufactured and ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate ...

This electric propulsion concept is characterized by an onboard energy storage system, which receives its energy from punctual installed wayside high-speed ...

U.S. carmaker Tesla's new Megafactory in Shanghai, dedicated to manufacturing its energy-storage batteries, known as Megapacks, launched production on Tuesday, marking a ...

ATEPS builds energy storage systems for renewable power plants. Since we use docking frames equipped with Han-Modular connectors as interfaces for our storage drawers, we are able to pre ...

A solar docking station is successfully installed in the college campus with the proposed inverter for charging the laptops and mobile phones.

An example of an apparatus to connect a power distribution network with a mobile utility-scale energy storage unit is provided. The apparatus includes an enclosure to protect an interior space...

As reported by our sister site PV Tech yesterday, that included 22 new solar PV projects and one energy storage project, which it would either own and operate itself, or contract for with third ...

The Megapack, which is an advanced battery system designed for large-scale energy projects, can store more than 3,900 kilowatt-hours of ...
