-----

The Irish energy and infrastructure landscape experienced a transformative year in 2025, marked by pivotal regulatory decisions, major project milestones and policy developments across ...

At Energy Storage Ireland 2025, the message was clear: energy storage is central to a stable, low-carbon grid, and while short-duration battery systems (BESS) are available,...

With at least 720MWh of energy storage deployed - and 1GWh in construction - the growth of the energy storage market in Ireland has been ...

Energy Storage Ireland's 2025 pipeline survey shows the potential of the energy storage sector in Ireland and Northern Ireland with nearly 10GW of storage in development.

SEAI's Energy in Ireland 2025 report delivers a comprehensive statistical analysis of Ireland's energy system, covering supply, transformation, and end-use demand.

Energy storage systems are vital to Ireland's renewable ambitions. Learn how batteries, long-duration storage and grid upgrades will help deliver clean power

"The fundamentals for storage are really strong in Ireland, because we're a relatively isolated system on the periphery of Europe. As we get to 2030 and Ireland starts building lots of ...

The first national policy for energy storage in Ireland was released in July making a strong push for immediately investing in electricity storage to help meet 2030 targets.

Important to note that the pipeline results demonstrate the capacity in the storage sector and potential build-out. The results are not intended as a prediction as to what may occur. The results help identify ...
