Our projects combine academic research with industry expertise to develop meaningful economic and system-relevant insights on electricity storage. Storage Lab is led by Dr Oliver Schmidt.

Historically, LDES systems have been mainly associated with pumped-hydro schemes. However, more recently, advancements in technologies - such as Compressed Air Energy Storage ...

This UKERC Landscape provides an overview of the competencies and publicly funded activities in energy storage research, development and ...

This research project focusses on analysing these pinch points and forecasting potential demand to understand how to augment the existing infrastructure with stationary storage to facilitate ...

Storing renewable energy in large batteries to help balance the energy market is technically feasible at large scale across the UK and EU, but it ...

See the achievements and progress the Faraday institution has made for the UK in energy storage research, commercialisation, market analysis & skills development.

CORNEX New Energy Co., Ltd. is an innovative technology enterprise specializing in the research, development, production, sales, and service of new energy storage batteries, EV batteries, ...

Our research groups develop innovative sustainable and resilient energy storage systems and assess their environmental and economic impacts ...

We aim to ensure effective and efficient use of the significant investments in research infrastructure for energy storage. We will also ensure that data generated is curated, accessible and ...
