In addition to the skillful use of local, affordable clean energy sources (such as wind and solar with storage solutions), we must ensure the existence of sufficient controllable capacity in Estonia.

The Estonian government's decision to delay offshore wind energy auctions and cancel the EUR2.6 billion support plan, along with measures for the energy storage facility, has raised concerns among ...

Coalition partner Eesti 200 is delaying Estonia's onshore wind subsidy reverse auction until the government decides how to support energy storage and offshore wind. Earlier this year, the ...

As intermittent renewable capacity grows, energy storage becomes critical for balancing supply and demand. Estonia's relatively small grid makes it particularly sensitive to fluctuations in ...

We must accelerate the transition to clean energy, including wind energy, to achieve our climate goals and ensure energy security.

Targeted financing instruments and risk-mitigating guarantee schemes need to be introduced at the EU level to support investments in offshore wind and long-duration energy storage.

Here, we have carefully selected a range of videos and relevant information about Estonia's wind power and energy storage supporting requirements, tailored to meet your interests and needs.

The Estonian coalition agreed on the long-term energy development plan, which includes a measure to support long-duration energy storage. On 27 January, the Estonian government coalition announced ...

In 2023, Estonia amended its fundamentals of climate policy until 2050, embedding climate neutrality objective by 2050, and providing guidelines for climate change mitigation in the energy and industry, ...
