Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

The latest analysis from SolarPower Europe reveals that, in 2024, Europe installed 21.9 GWh of new battery energy storage systems (BESS), just ...

Europe's battery storage capacity grew in 2024, yet at a slower pace, reports Solar Power Europe.

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total ...

Energy storage solutions face major roadblocks due to regulatory uncertainty in Eastern Europe. The market cannot develop quickly because current frameworks don't provide enough support, even...

Findings from Enlit Europe 2024. The European energy transition, aimed at reducing reliance on fossil fuels and increasing the use of renewable energy sources (RES), is experiencing a noticeable ...

Europe's battery energy storage market experienced a notable slowdown in its growth rate during 2024, yet it is projected to regain significant momentum in the coming years, primarily ...

In 2024, the European battery energy storage system (BESS) market slowed its pace. While nearly 20 GWh of new capacity was added in 2023, ...

Battery growth in Europe will be curbed by permitting and market challenges in the coming years and developers remain dependent on Chinese suppliers. February 26 - Battery storage ...
