In order to reduce the risk of the power grid in the process of transformation, this paper proposes to optimize the sequence of the exit of the regional thermal power generator group.

The plant came online in 1976, and was shut down in late 2019. Officials recently announced the facility will reopen as a natural gas-fired power ...

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve

Find the latest research papers and news in Direct Steam Generation in Solar Thermal Power Systems. Read stories and opinions from top researchers in our research community.

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility ...

California built a \$2.2 billion solar thermal project in the Mojave Desert in the early 2010s, with 75% of it funded by the Obama administration through loan guarantees. The project, the ...

The Solar Futures Study, initiated by the U.S. Department of Energy (DOE) Solar Energy Technologies Office and led by the National Renewable Energy Laboratory (NREL), envisions how, over the next ...

This review highlights key issues in solar thermal energy storage, such as technological, financial, and environmental challenges. It identifies gaps in current literature regarding high ...

Exiting solar thermal power generation

SETO funding for CSP research is awarded to projects that substantially advance, develop, or engineer new concepts in the collector, receiver, thermal storage, heat transfer media, and power cycle ...
