-----

Thanks to PVBL's continuous improvements to its evaluation system, more and more overseas institutions are paying closer attention to its annual ...

Compared to existing datasets, it provides better precision and spatial detail, showing global PV growth of over 60% between 2019 and 2022, with developing countries leading the increase.

Kiwa PVEL's Product Qualification Program (PQP) and Scorecard are the global solar industry's trusted resources for PV module reliability and performance data. In this 11th edition of the Scorecard, Kiwa ...

This comprehensive guide will take you through the complete picture of solar panel manufacturing in 2025, from raw material sourcing to final ...

The Renewable Energy Test Center (RETC) released its 2024 PV Module Index report, evaluating the reliability, quality, and performance of solar ...

A global solar panel directory with advanced filters that lets you review and compare panels. Pictures, datasheets, PDFs are shown.

The 2025 PV Module Manufacturing Quality Report by Kiwa PI Berlin provides a deep dive into the current state of global PV manufacturing, highlighting key ...

Kiwa PI Berlin released its latest report reviewing the quality of solar panel manufacturers, noting that new production regions (especially the United States) report higher ...

The global photovoltaic (PV) tracker industry is steadily moving beyond scale-driven competition toward a model centered on quality, sustainability, and long-term operational reliability, ...
