---

Analysis from the IEA shows that the lithium battery market is booming, but that overreliance on China is becoming a concern for global energy security The lithium-ion battery sector ...

By bridging the gap between academic research and real-world implementation, this review underscores the critical role of lithium-ion batteries in achieving decarbonization, integrating ...

Our analysis provides a quantitative basis for the value-emission paradox within the global lithium-ion battery supply chain.

Grid-scale battery energy storage systems will become a growing part of lithium consumption in 2026, underpinned by an increasing emphasis on grid stability amid the transition to ...

The global lithium-ion battery market exceeded USD 150 billion in 2025, an increase of over 20% from 2024, but its economic and strategic significance extends far beyond market size.

By emphasizing sustainability, leading battery players will differentiate themselves from the competition and generate value while simultaneously protecting the environment. The strategies and goals ...

The transition from small-form factor cells and use in electronics to large-scale grid deployment has been enabled by the ability to mass produce cells and make closed-case batteries in several sizes ...

Uncover Deloitte's latest insights on global energy storage and how digital technologies and market innovation are helping accelerate battery storage ...

This global report on Solar Batteries analyzes the market based on type and end-use sector.
