Total electricity production in Finland. Based on real-time measurements and computational estimates of power plants.

In recent years, Fingrid has been leading the development of methods to ensure the technical functionality of converter-dominated ...

Fingrid conducted a offshore wind grid connection study in the spring 2024. Study is now being updated based on customer feedback. Generation adequacy needs more attention -A targeted ...

Merus Power has brought online the Nordic region's first grid-forming battery energy storage system (BESS), a 30 MW / 36 MWh plant ...

Finland has launched the Nordic region's first grid-forming battery energy storage system (BESS) at Fingrid's Virkkala substation. ...

Statkraft signs PPA for battery systems in Finland with OX2 Batteries to manage wind power volatility, ensure supply reliability Finnish wind power capacity has nearly tripled ...

This master's thesis investigates the ability of GFM BESS to improve the converter-driven stability of wind power in the Finnish power system. The stabilization capability of GFM BESS is ...

In the EU's decarbonization effort, high-voltage electrode boilers play a critical role in applications requiring rapid load absorption ...

Synchronous condensers to enhance grid stability in Ireland, Finland ... Siemens Energy is delivering a hybrid grid stabilisation system - consisting of synchronous condenser (with ...
