OverviewRenewable energyElectricity supply and demandAccess to electricityService qualityResponsibilities in the electricity sectorSector policyHistory of the electricity sectorGuyana has a massive but yet unrealized potential for hydropower generation. Hydropower generation capacity has been estimated at 7,600 MW, that is, more than 30 times the current installed capacity in the country. Feasibility studies have been carried out for specific projects, but up to now, this potential remains untapped, mainly due to the considerable capital investments required to set up new power facilities. Indeed, beside the actual investment in generation plants, transmission lines would also be r...
