Rooftop solar in industrial zones has the foundations to become a new driver of Hanoi's energy transition.

The plan focuses on developing new and renewable energy sources to meet electricity demand, ensure energy security, reduce greenhouse gas ...

Scientists developed a reusable liquid that captures and stores solar energy as heat, offering a battery-free alternative for heating and more.

This study bridges this gap by showcasing the establishment of roof and facade greening on an apartment building and quantitatively assessing its thermal and physiological performance ...

HANOI: Vietnam is revising its energy plans to focus more on large solar farms and less on reliance on coal and natural gas. The fast-growing ...

"The energy partnership between Viet Nam and Denmark has yielded fruitful results and tangible benefits for both countries. The energy sector of Viet Nam is now facing critical challenges in meeting ...

Collection of the experimental research data of a real rooftop solar power system can help to determine investment efficiency and provide authentic grounds for implementation basing on the ...

Overall, Hanoi's consistent sunshine makes it a favorable location for generating solar power year-round with proper installation techniques and maintenance ...

A DNA-inspired liquid stores solar energy for months, releasing it as heat on demand.
