2025-26 Special Edition GK/GS Revision E-Book with 550+ chapter-wise questions for SSC CGL, CHSL, Railway exams.

We're on a journey to advance and democratize artificial intelligence through open source and open science.

The Desert Sunlight Solar Farm is one of the largest sources of solar power in the US, located 225 miles from Palm Springs and 42.3 miles from Mojave Desert. Developed by First Solar at a project cost of ...

This cabinet can economically house a variety of next generation electronic equipment including telco backhaul, fiber distribution, and radio equipment for wireless applications.

Deep in the vast desert interior, a solar-powered communication base station operates continuously, delivering stable signals that connect nomadic communities and remote work sites to ...

The Desert Sunlight Solar Farm is a 550-megawatt (MWAC) fixed-tilt photovoltaic power station approximately 6 miles (9.7 km) north of Desert Center, California, United States, in the Mojave Desert. It was made by the US thin-film manufacturer First Solar but now has split ownership between NextEra Energy Resources, Clearway Energy, and California Public Employee's Retirement System (CalPERS). It has the same 55...
