The Huawei FusionCharge solution sets new standards in the field of fast charging infrastructure. With a charging capacity of up to 600 kW and innovative liquid ...

Today, Huawei launched a brand-new fully liquid-cooled 1.5 megawatt-class supercharger for EVs (electric vehicles). It is the industry's first ...

As the first supercharging station put into operation by Yumiao Chong, the station adopts Huawei's supercharging technology solution. The station is equipped with a full liquid-cooled supercharger with ...

Huawei claims this represents a nearly fourfold improvement in replenishment efficiency compared to traditional fast-charging stations. A key technological innovation is the charger's ...

AC/DC and DC/DC modules decoupled, power units can better utilize power capacity and be accessible to DC ESS coupling. An innovative liquid-cooled architecture with DC bus enables ...

As a solution provider in the field of charging network, Huawei Intelligent charging Network exhibited Huawei's liquid-cooled overcharge solution at the exhibition site, integrating optical ...

Huawei delivers an ultra fast charging station for electric vehicles using liquid-cooled technology, high power output, safe operation, and scalable deployment ...

For type "Boost" 2x 400kW can be achieved simultaneously. The power of dispenser is limited by the max. power of the power unit. Time duration for max. current is 20 min for Liquid-cooled type and 10 ...

Compared with traditional solutions, Huawei innovatively adopts the liquid cooling technology and DC bus architecture. The product can output a maximum of 720 kW power at full configuration, and ...
