The Ulsan Substation Energy Storage System is a 32,000kW lithium-ion battery energy storage project located in Namgu, Ulsan, South Korea. The rated storage capacity of the project is 8,000kWh.

In May 2019, Energy Storage Partnership (ESP) comprising WB Group and 29 organizations was announced, to support the development of energy storage solutions in developing countries.

South Korea is ramping up its battery energy storage deployment with a new 540MW tender to stabilize the grid and support renewable energy ...

The project aims to help reduce electricity waste from renewable sources by storing surplus power during low-demand periods and releasing it when demand is high.

A global surge in renewable energy and data centre demand is powering a boom in using batteries for storage on electricity grids, creating a new front in the battle between ...

As part of its ambitious energy transition, South Korea is launching a major procurement effort for battery energy storage systems (BESS), seeking to add 540MW of new capacity to its grid infrastructure.

Korean Electric Power Corporation (KEPCO) said last week (26 September) that a completion ceremony was held for what it claimed is Asia's ...

South Korea's battery makers, including LG Energy Solution and SK On, have been squeezed by waning EV subsidies and shifting demand, ...

Bright Energy Partners (BEP) announced it has been selected as the preferred bidder for a 162MW battery energy storage system (BESS) project through the Korea Power Exchange's second ...
