With 100% of Iceland's electricity coming from renewable sources, Reykjavik has become a global testbed for energy storage solutions. The city's unique combination of geothermal and hydroelectric ...

OverviewConnection to the rest of EuropeProduction and ConsumptionTransmissionDistributionCompetitionThere are plans to connect the Icelandic grid with the UK using a subsea High-Voltage DC (HVDC) interconnector, with a potential capacity of up to 1.2GW, called Icelink. It would be the world's longest submarine HVDC cable, if built. This would allow Iceland to export excess energy to UK and in turn linking it to a wider European super grid. The project is in planning stages and is controversial in Iceland due to fears of increased ...

At Baseload Power Iceland, we specialize in unlocking the full potential of Iceland's geothermal resources. As pioneers in our sector, we ...
