At Weijiamao Coal Power Co. Ltd., photovoltaic panels are strategically positioned atop the factory buildings. From the air, black coal, green ...

The "Junma" photovoltaic power station actively explores the new industrial development model of "on-board power generation, under-board ...

Inner Mongolia hosts China's largest concentration of utility-scale PV plants, including the Great Solar Wall, a massive cluster of PV projects in the ...

China's largest back-contact (BC) solar power plant has officially been connected to the grid. The 500 MW Dalate Banner project in Inner Mongolia is powered entirely by LONGi's HPBC 2.0 ...

Leveraging its advantages in wind and solar energy resources, Inner Mongolia, supported by national energy policy, has prioritized the development of the wind power and ...

Desertification poses a significant environmental challenge in Inner Mongolia, and the adoption of solar PV offers a solution to mitigate further evaporation and facilitate vegetation regeneration in the region.

Mongolia's share of women working in renewable energy is below global averages, underlining the need for additional measures to ensure gender equality in the sector.

The Inner Mongolia autonomous region is leveraging its abundant wind and solar power potential to revolutionize its energy landscape, transforming itself into a hub for clean, sustainable ...

Workers from CHN Energy Inner Mongolia Company dedicated their time and effort to transform the desolate landscape into a remarkable "blue ocean" of photovoltaic panels.
