Part 1 Preliminary and General Citation (1) These Regulations may be cited as the European Union (Planning and Development) (Renewable Energy) Regulations 2025. Part 3 of these Regulations ...

By participating in the Irish day-ahead energy market, energy storage can reduce day-a-head carbon emissions by 50% by using long-duration storage technologies. This makes a material contribution to ...

Energy storage systems are vital to Ireland's renewable ambitions. Learn how batteries, long-duration storage and grid upgrades will help deliver clean power

Looking ahead, the government plans to refine market mechanisms to sustain and expand energy storage capacity beyond 2030, ensuring that the ...

Implement the national energy storage strategy (electricity storage policy framework) with input from industry to set clear objectives and actions and put in place resources in Government, the ...

The requirements of I.S. 10101 must be met, particularly relating to the requirements of "standby supply" and break-before-make changeover switch, and the requirements for neutral treatment in island ...

Solar PV systems and battery storage solutions (including EV batteries with Vehicle to home/grid capabilities) are increasingly being designed to act in response to dynamic conditions, ...

Large battery storage units are now playing a bigger role on Ireland's electricity system, after a large change introduced by EirGrid and its partners last year. Before November 2025, grid ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...
