Fifth Generation HEXFETs from International Rectifier utilize advanced processing techniques to achieve extremely low on-resistance per silicon area.

Average Time to Ship 1-3 Days. Please see product page, cart, and checkout for actual ship speed. a. Repetitive rating; pulse width. d. 1.6 mm from case. This datasheet is subject to change without ...

Its fast switching speed, with turn-on and turn-off times in the nanosecond range, makes it highly effective in high-frequency switching ...

This benefit combined with the fast switching speed and ruggedized device design that HEXFET power MOSFETs are well known for, provides the designer with an extremely efficient and reliable device ...

isN-Channel MOSFET Transistor IRFP250 FEATURES Low drain-source on-resistance RDS (ON) 85m @V =10V GS Enhancement mode Vth = 2.0 to 4.0V ...

Inverters use a technology known as Maximum Power Point Tracking to optimize photovoltaic solar panel output; this technology allows the micro-inverters to harvest most power from each panel.

Shop quality 48V inverters featuring LCD displays, USB ports, and multiple AC outlets. Perfect for camping, RVs, and solar applications.

How to make modified sine wave Inverter 1000w using irfp250, Bc547 circuit diagram ???:-...more

Part #: IRFP250. Description: N-CHANNEL 200V - 0.073ohm - 33A TO-247 PowerMesh II MOSFET. File Size: 255.93 Kbytes. Manufacturer: STMicroelectronics.
