The Intensium® Shift is Saft's modular and ready to install containerized Energy Storage System (ESS), enabling space-optimized utility-scale storage solutions for renewables and power grids.

This data sheet describes loss prevention recommendations for the design, operation, protection, inspection, maintenance, and testing of stationary lithium-ion battery (LIB) energy storage systems ...

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems ...

Learn how to safely install and configure your LiFePO₄ battery system. This complete guide covers wiring, parallel/series connections, safety, and ...

Discover the benefits and features of Containerized Battery Energy Storage Systems (BESS). Learn how these solutions provide efficient, scalable ...

The EnerC+ container is a modular integrated product with rechargeable lithium-ion batteries. It offers high energy density, long service life, and efficient energy release for over 2 hours.

Designed with A+ grade lithium iron phosphate (LiFePO₄) battery cells and a smart BMS, it ensures long lifespan and safe operation. With its plug-and-play setup ...

The project features a 2.5MW/5MWh energy storage system with a non-walk-in design which facilitates equipment installation and maintenance, while ensuring long-term safe and reliable operation of the ...

Battery energy storage systems, or BESS, are a type of energy storage solution that can provide backup power for microgrids and assist in load leveling and grid support.
