-----

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more.

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

Solar and wind accounted for 91% of new US electrical generating capacity added in H1 2025, according to data just released by FERC.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Committed to Restoring America's Energy Dominance.

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest ...

Solar continues to dominate new electricity generation capacity added to the grid in the United States, according to the Energy Information ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.
