This adhesive combines a good balance of tack and adhesion with excellent shear strength. Because of these properties this product has found specific use as a fixing tape in the manufacture of solar panels.

It's designed to replace glass in flexible thin film solar panels, delivering high light transmission, superb moisture barrier performance and excellent weatherability.

The results demonstrated that installing clear acrylic sheet will reduce the photovoltaic surface temperatures, enhance the performance, increase the electrical energy production, and ...

Norgard Film has become increasingly popular in solar photovoltaic applications as a transparent and insulative material for encapsulating and protecting solar cells.

I am looking at panels for a system that I am in the planning stage with. I have a few questions that I was hoping to get some input on so I do not make a mistake that I will regret down ...

Trusted by PV module manufacturers for more than 20 years, this solar edge seal tape protects cells, connections and transparent conductive oxide coatings from moisture ingress, helping ...

New solar panels often arrive with protective film--but should it stay on? This comprehensive guide explains the crucial difference between factory ...

Yes, you can use clear plastic to cover your solar panels and the panels will work. However, it is important to note that the type of plastic you use ...

Why We Recommend It: This butyl rubber tape offers exceptional waterproofing, strong adhesion to diverse surfaces, and easy cut-and-apply installation. It's specifically designed for flexible ...
