These 800 MW of storage capacity represent a major milestone in Italy's energy transition, enhancing system stability and facilitating the integration of renewable sources.

“It is reasonable to expect that, when fully operational, all new renewable energy plants will already be installed with integrated storage systems. And where the market does not cover the...

The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033.

Dyness is a global research, development and manufacturing company of solar energy storage battery systems, providing high voltage, low voltage and other ...

By 2030, the country is targeting 28GW of wind power and nearly 80GW of solar capacity, making energy storage essential for ensuring grid stability and maximizing renewable integration. Therefore, ...

Start of construction: Enel Green Power announces the start of construction of the Trino PV+BESS solar and storage park.

When Italy flipped the switch on its first grid-scale energy storage facility in 2023 near Milan, it wasn't just local engineers doing cartwheels. This 35MW lithium-ion battery system - about ...

On December 21, 2023, the European Commission greenlit a substantial EUR17.7 billion state aid initiative by Italy to boost the development and ...

This project reflects EDP's commitment to the energy transition in Italy and to delivering sustainable, cost-effective solutions to our clients. We're proud to partner with SIAD Group to support ...
