This study investigated the real-time energy consumption and air pollutant (PM 10, PM 2.5, NO<sub>x</sub>, SO<sub>x</sub>, CO, and HC) emissions from a container ship's generator during transpacific voyages.

Among the multiple advantages that it offers, the gas-engine-based solution does not generate soot particles or Sulphur oxides (SO<sub>x</sub>), while producing 80% fewer ...

The FuelEU maritime regulation promotes the use of renewable, low-carbon fuels and clean energy technologies for ships, essential to support decarbonisation in ...

It delivers clean, silent, low-maintenance electricity wherever it is deployed, independent of fuel trucks and noisy engines. For health practitioners, ...

A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and ...

The container generators are fully operational supplied, including air-intake, exhaust system and silenced muffler, tank, control panel and accessories such as lighting and fire extinguishers.

As renewable energy adoption accelerates globally, Lisbon emerges as a strategic hub for innovative containerized energy storage systems. This article explores how modular energy storage solutions ...

Green Power Systems offers the possibility of installing generators inside CONTAINERS of 10" / 20" (BOX and HC) / 30" / 40" (BOX and HC) or ...

The Atlas Copco QEC generators packs a punch, up to 1 megawatt of containerized power that can be easily transported from one worksite to the next. Supremely reliable, it is the flexible solution for your ...
