---

increased use of solar devices is not clear. Therefore, this study is designed to generate empirical evidence to improve understanding of household adoption, use, and impacts of solar ...

We analyze patterns of use and impacts of solar devices among households in rural Malawi, a country that broadly represents observed trends across rural Africa in its use of home solar ...

In partnership with a social enterprise (Vitalite, Malawi) we set out to uncover whether household solar systems could truly provide sustainable energy for all in Malawi. We surveyed 1,279 ...

SolarAid has overcome several obstacles to bring the benefits of home solar systems -- already widely enjoyed by wealthier households -- to rural homes where cash is in short supply.

While solar technology is taking off in Malawi, we found that most purchases are for cheaper solar devices that only have enough energy capacity to charge phones and run small lights.

The reduced cost of solar electricity has made electricity access affordable even to low-income households. Off-Grid electricity is playing a ...

Under this mechanism, MEAP has forged partnerships with five leading solar companies in Malawi, embarking on a connection campaign to provide solar ...

LILONGWE -- Four years ago, a U.K.-based charity, SolarAid, set out to provide solar-powered electricity to every home in Kasakula, a village around 90 kilometers, or 56 miles, from ...
