Advance your expertise in microgrid systems with our Graduate Certificate in Microgrid Planning and Implementation. Gain skills to design, optimize, and deploy sustainable energy solutions.

Our team conducts research promoting energy security for military installations and improving the reliability and variety of operational energy solutions available to the military.

On this six-week microcredential from Deakin University, you'll become an expert in renewable energy microgrids. Focusing on the Australian market, you'll delve into renewable energy ...

Master of Engineering in Smart Grid Systems and Technologies covers electric utility, renewable, distributed generation, electrical and microgrid power systems.

Designing microgrids for military bases: an internship perspective From July to September 2025, fourth-year Civil and Environmental Engineering PhD student Mateus Gheorghe de Castro ...

Embark on a transformative journey with our Postgraduate Certificate in Smart Grids and Microgrids for Renewable Energy Integration. This cutting-edge program equips you with the expertise to integrate ...

The course participants will learn about advanced modeling, control strategies, and operation management systems for Microgrids in both grid ...

As one of the premier applied engineering research centers in distributed energy resources and microgrids, we are building the human and operational capacity needed for a secure, resilient, and ...

Over the past five years, a multidisciplinary team of Naval Postgraduate School (NPS) faculty has been supporting the development of an energy renaissance of sorts with the potential to ...
