To ensure a user-friendly process while maintaining data integrity, Open PV has a flexible database structure, robust data quality features, and procedures in place to reduce data duplication.

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

From someone who's looking to add solar to their roof, to someone whose job requires them to understand solar, these web resources will help everyone understand solar energy.

In 2024, PV accounted for 14.5% of net electricity generation and all renewable energies for around 62%. In 2024 GHG emissions of about 51 million tons CO₂ equivalents were avoided due to 74 TWh ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

A searchable online software discovery platform and knowledge base, developed by NLR, and powered by OpenEI: Open Energy Information.

NLR develops data and tools for modeling and analyzing photovoltaic (PV) technologies. View all of NLR's solar-related data and tools, including more PV-related resources, or a selected list ...

Solar Energy Corporation of India Limited (SECI) is a Schedule-A CPSE under the Ministry of New and Renewable Energy (MNRE) for ...

DGStats will soon grow to include different types of renewable energy generation. "Behind-the-meter" facilities" energy generation can be used directly by the ...
