Solar power continues its run as the fastest-growing source of new generation. Developers plan to add 43.4 GW of utility-scale solar in 2026, a 60% increase over the record ...

In this article, we will explore the key innovations in solar technology expected to dominate in 2025 and beyond, providing a comprehensive overview of the technologies, ...

Latest solar power news from Europe, Latin America, Sub-Saharan Africa, APAC, MENA and more. Stay updated on solar PV, solar energy, policy & projects.

Solar electricity is growing rapidly, but can it really dominate the global energy system? Here is what it will take ...

This data-driven research on 3050+ solar energy startups and scaleups highlights advancements in off-grid solar energy, decentralized ...

The U.S. Energy Information Agency expects growth in U.S. power generation over the next two years to be mostly driven by new ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary ...

Solar Energy Information. Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

Discover the latest innovations and trends shaping the future of solar energy innovations, from advanced ...
