Kiribati's energy story highlights both the successes and pitfalls of off-grid solar projects in the South Pacific, a region that includes some of the world's poorest countries.

When the government of Kiribati decided it was time for policies that would promote rural electrification, it focused its efforts on providing off-grid photovoltaic systems to families at a low cost.

The EKLIPSE project aims to sustainably improve power supply and access in the Line Islands with a focus on renewable energy (solar PV and BESS integrated with existing diesel generators), efficiency ...

For this installation, RPC designed a 20 kW off-grid solar-battery system to provide 24-hour electricity to the multi-use facility. The system integrates advanced storage and SMA inverter ...

Kiribati's energy story highlights both the successes and pitfalls of off-grid solar projects in the South Pacific, a region that includes some of the world's poorest countries.

The more specific objective of the KGES is in expanding the use of renewable energy through the application of solar photovoltaic on outer islands and in ...

The South Tarawa Renewable Energy Project (STREP or the Project) will support upscaling of solar power generation in Kiribati. The Project will reduce dependence on fossil fuel imports by increasing ...

Installation, operation and maintenance of Solar mini-grid at the remote islets of Tebikera and Nuotaea complemented with RO system for producing freshwater ...

Since 2015, Matai Trading has been at the forefront of delivering life-changing off-grid solar solutions to some of the most isolated parts of Kiribati.
